

PramaanAI

Explainable AI for Tender Evaluation & Eligibility Analysis

Prepared by:

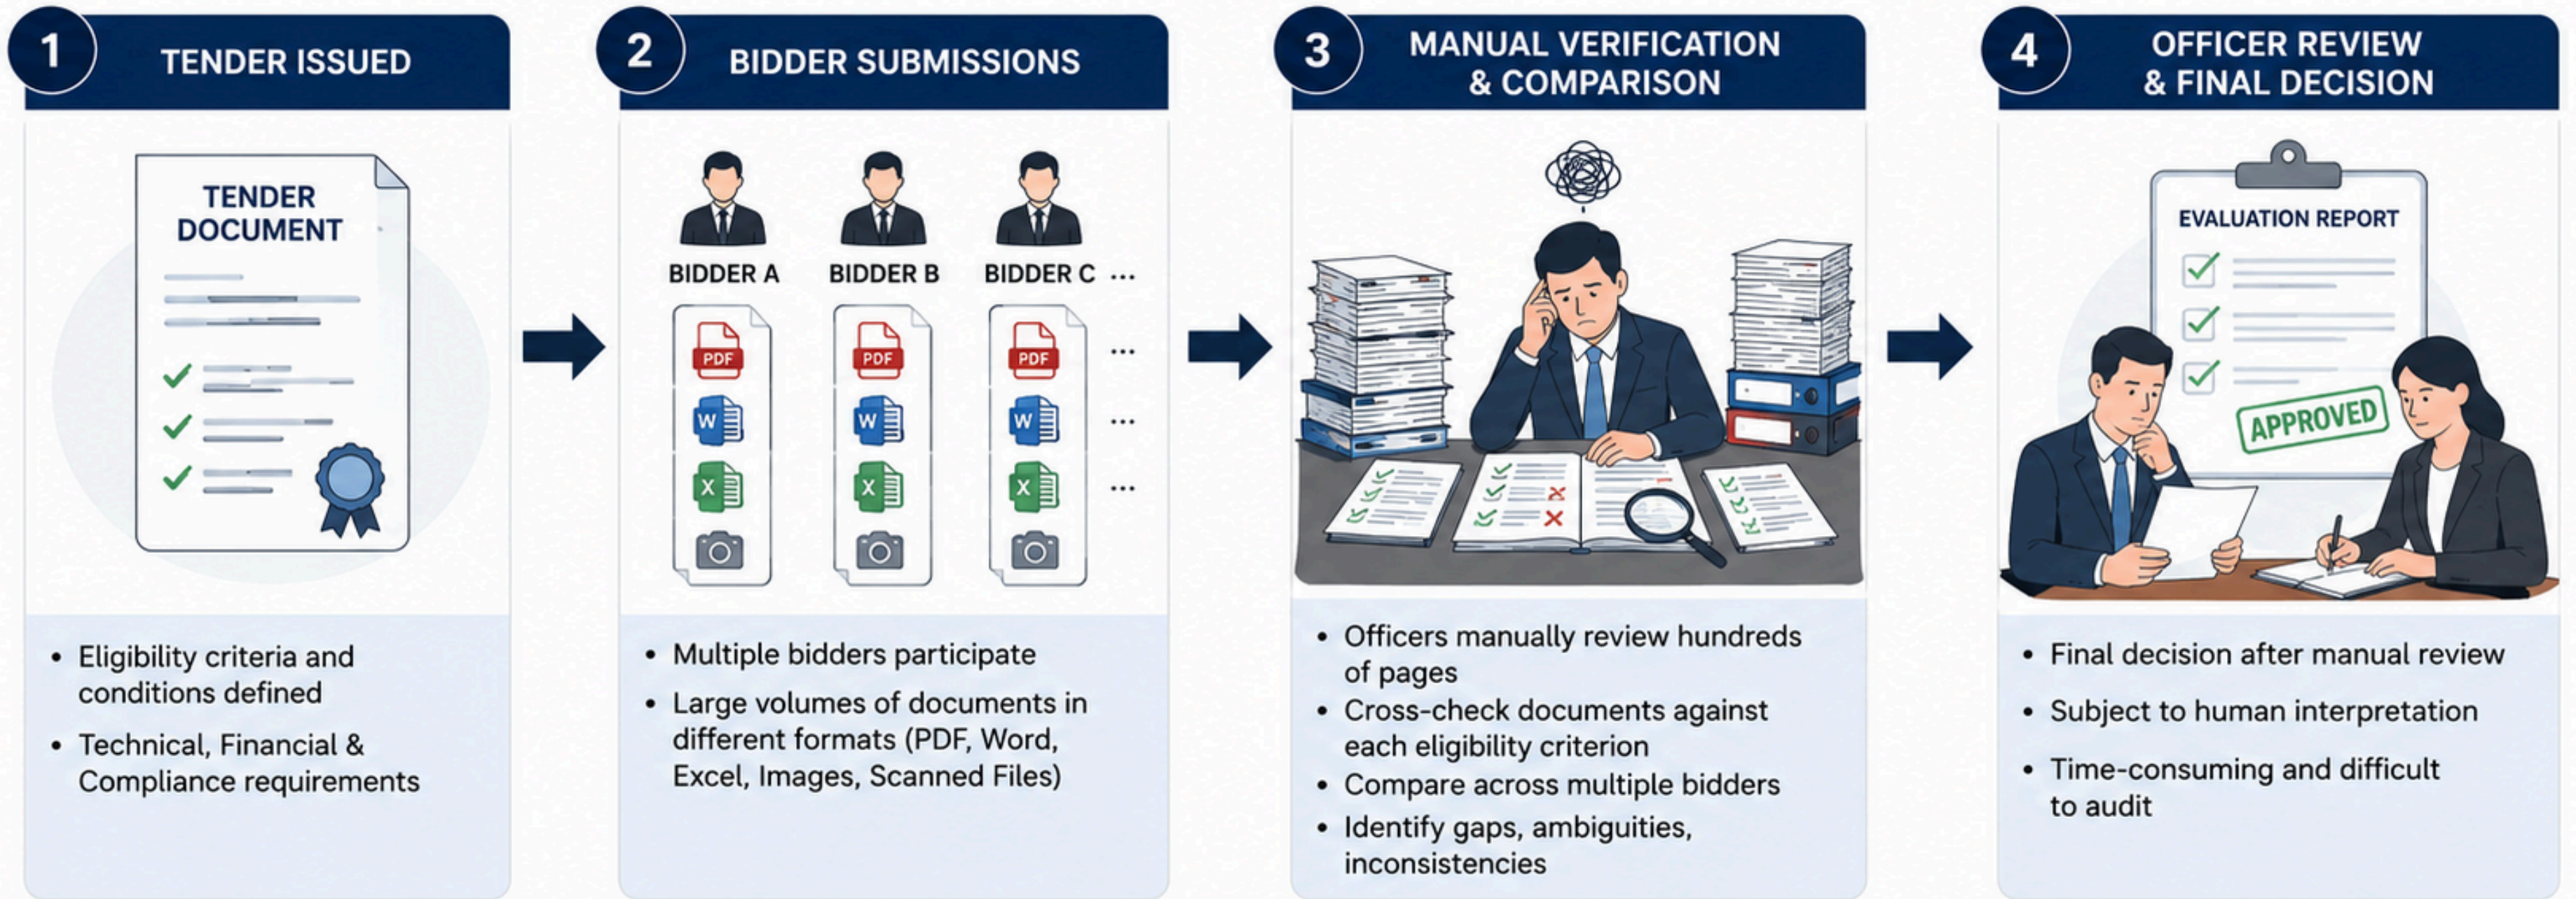

Jonathan Antony

Govind Sankar

Joel Joseph Justin

CURRENT MANUAL TENDER EVALUATION PROCESS

Time-consuming, complex, and prone to inconsistency

KEY PAIN POINTS

Time Intensive

Days to weeks for initial evaluation

Document Complexity

Scanned, rotated, incomplete, low-quality files

Inconsistent Evaluation

Different officers may interpret criteria differently

High Risk of Oversight

Important details may be missed

Audit Challenges

Hard to trace decisions and justifications

Manual process is slow, resource-heavy, inconsistent, and difficult to audit. | This is the problem PramaanAI solves.

Operational Impact

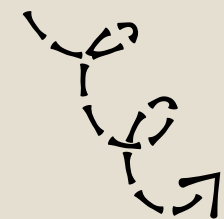

Procurement officers spend valuable time on document verification instead of decision-making.

Time Burden

Human Error

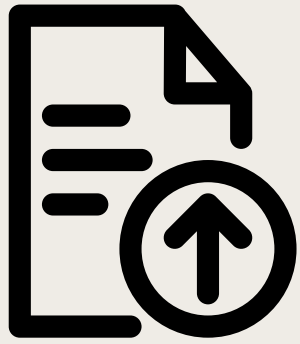

Inconsistency

Audit Difficulty

Introducing PramaanAI

1. Evaluation Intake & Setup

Tender and bidder documents are uploaded, validated, and parsed for eligibility extraction.

2. Cross-Bidder Evaluation

Bidder submissions are mapped against extracted criteria to generate explainable eligibility assessments.

3. Bidder Investigation & Review

Officers inspect evidence, trace AI reasoning, and resolve ambiguous or low-confidence cases.

4. Evaluation Closure & Certification

Final outcomes are reviewed, certified, and exported as audit-ready procurement reports.

Core Capabilities

Automatic Criteria Extraction

Extracts technical, financial, and compliance criteria from tender documents.

Mandatory vs. Optional Identification

Distinguishes required conditions from optional ones for precise evaluation.

Multi-Format Document Parsing

Parses scanned PDFs, images, Word files, and tables with high accuracy.

Criterion-Wise Eligibility Evaluation

Evaluates each bidder against every criterion individually.

Evidence Mapping

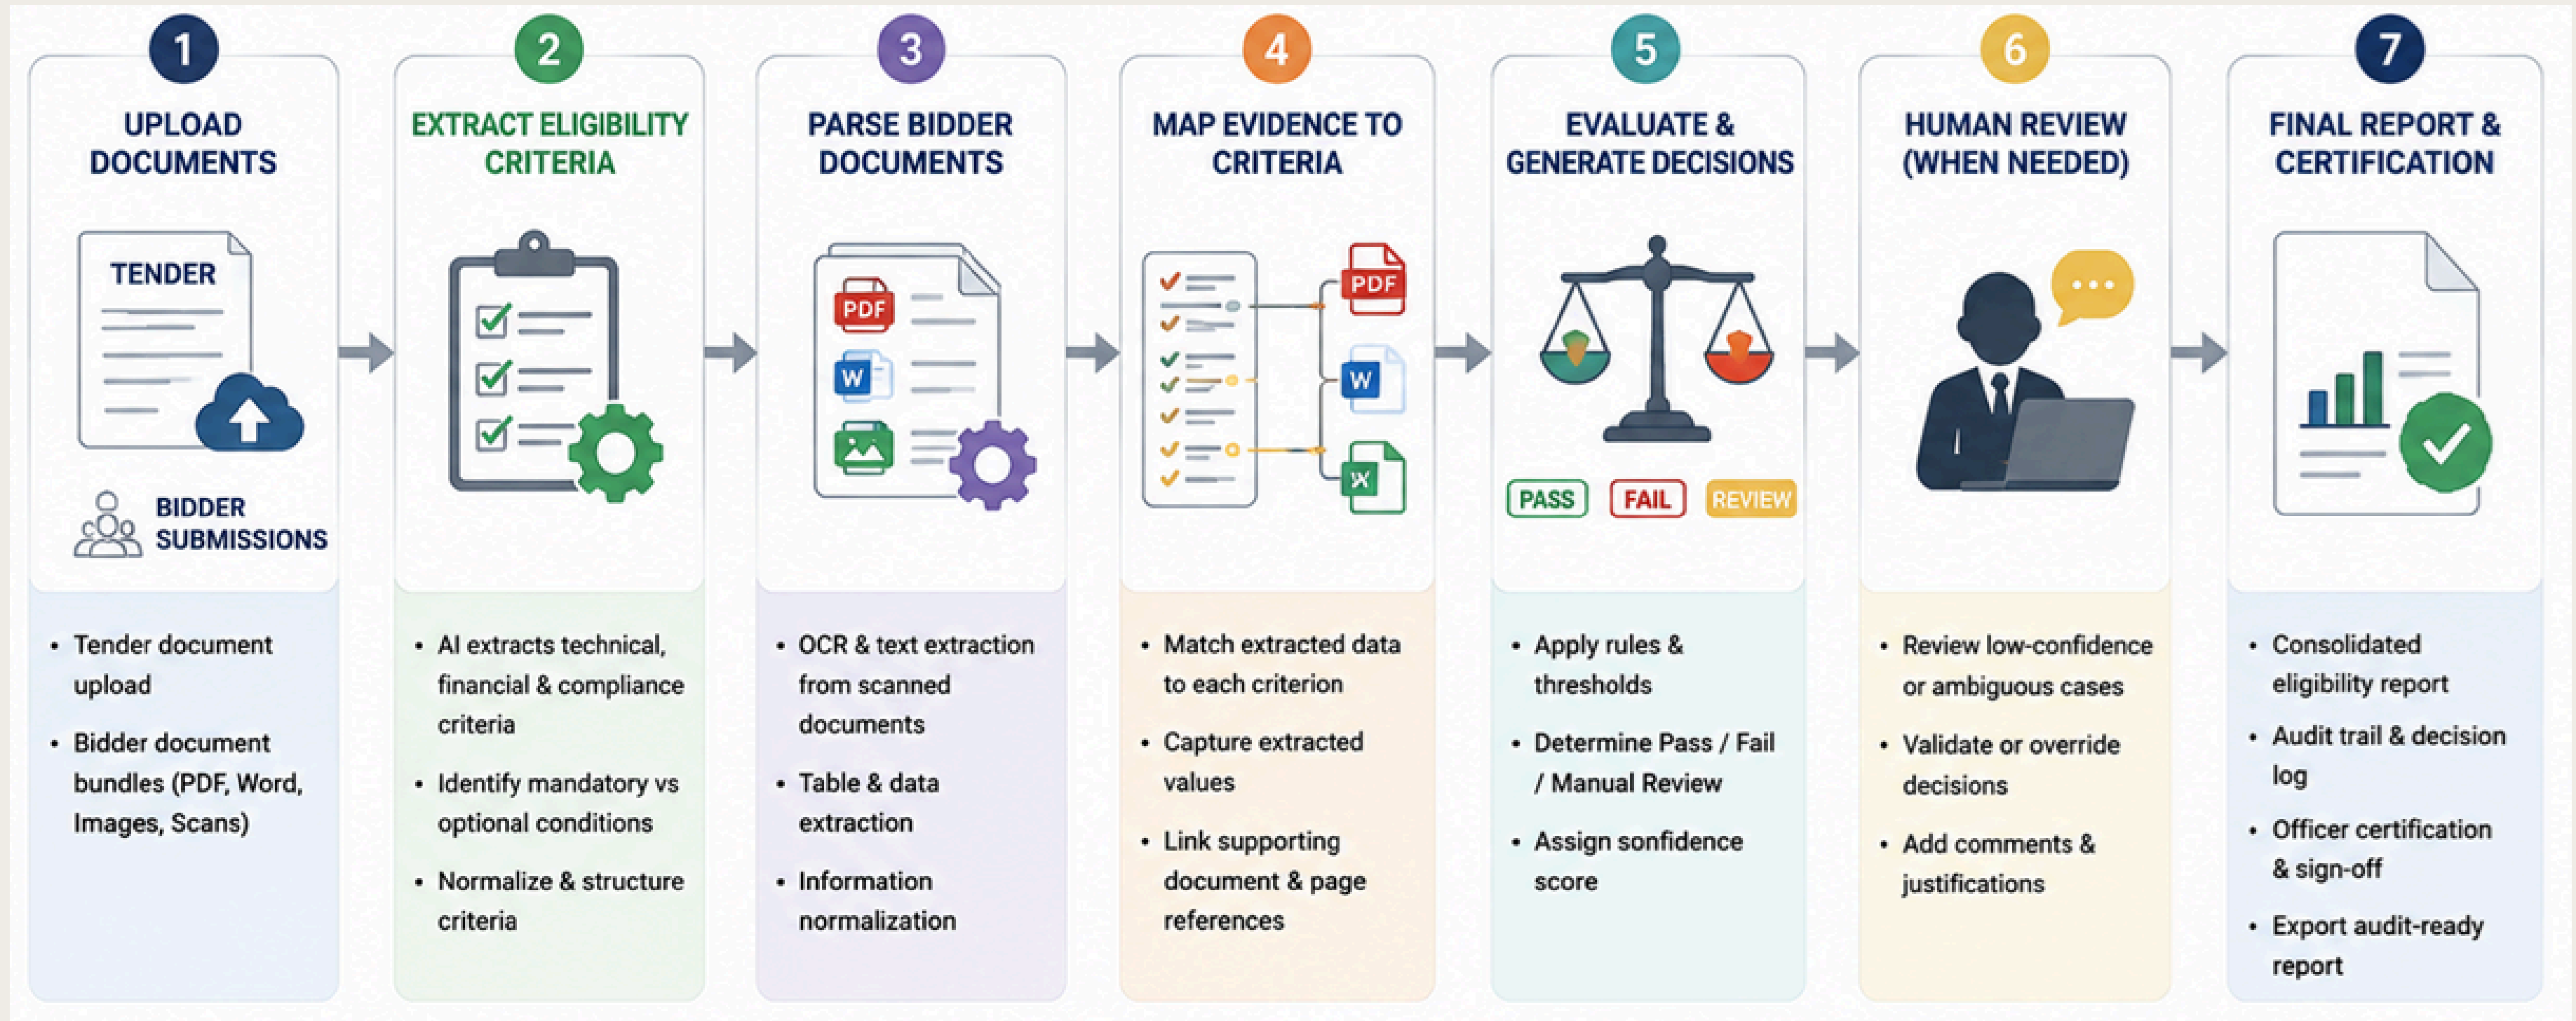

Links verdicts to page references, extracted values, and confidence indicators.

Human Review Routing

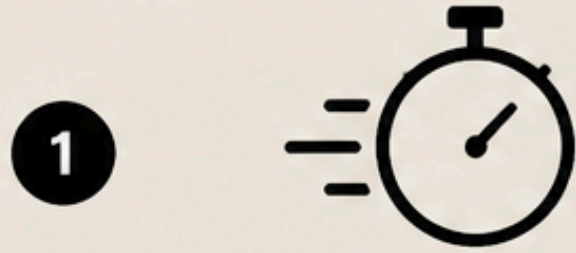

Routes ambiguous cases to officers for manual review and override.

End-to-End Evaluation Workflow

Each step is fully traceable — from document upload through final certification — ensuring every decision can be audited and justified.

Key Advantages of PramaanAI

1

Faster Evaluation Cycles

Reduces initial eligibility verification from days of manual review to minutes of assisted analysis.

2

Explainable AI Decisions

Every verdict is linked to extracted evidence, source documents, and criterion-level reasoning.

3

Human-in-the-Loop Oversight

Ambiguous or low-confidence cases are escalated for officer review instead of automatic rejection.

4

Handles Real-World Documents

Processes scanned PDFs, photographs, tables, rotated pages, and inconsistent submission formats.

5

Consistent Eligibility Assessment

Standardizes criterion evaluation across bidders, reducing subjective interpretation and oversight risk.

6

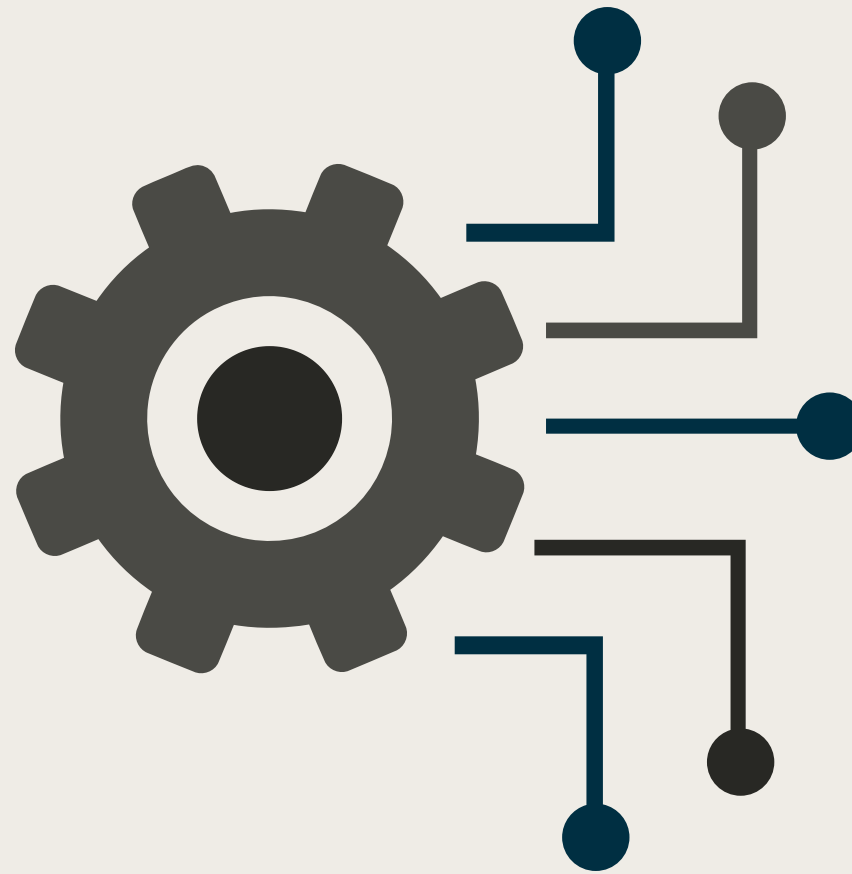

Audit-Ready Procurement Workflow

Maintains complete traceability through override logs, timestamps, evidence mapping, and exportable reports.

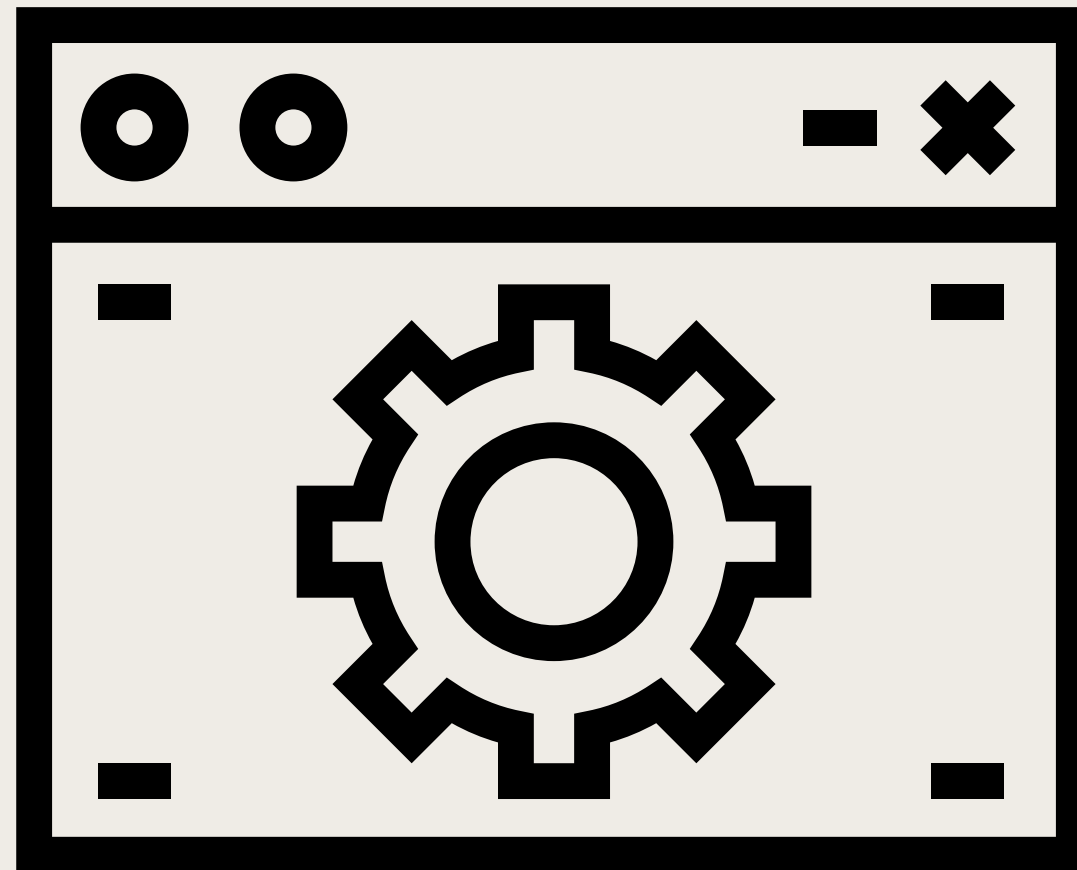

PramaanAI augments procurement officers with structured, transparent, and scalable evaluation intelligence.
